

# Ferrite Channel Magnets

These are C -profile ferromagnetic mild steel channels within which are placed magnets. They have a rectangular shape and work in a similar way to pot magnets. The ferrite magnet versions can operate at temperatures up to a maximum of +120 degrees C.

The channel magnets have two 4.2mm diameter fixing holes in the mild steel back plate section to allow them to be screwed onto an assembly.

- 120 maximum operating temperature
- Excellent resistance to corrosion
- Mild steel pot with red painted body
- C profile channel
