RS- 8625183

Ball Valve Lockout, 2-8in. Valve

Standard features:

- 8625183 Clamp's over the lever – preventing the valve from operating and can be installed in closed position only.
- This can be installed on most of the ball valves available internationally.
- They prevent valve handle from being turned on.
- The strong polyurethane plastic make them resistant from cracking & abrasion as well as from extreme temperature & weather conditions too.
- Non conductive.
